

The oriented film for securing pallets of hot, cold or frozen products

# CLIMAWRAP® – Protects hot- or frozen palletized products and lets fresh products breathe

Oriented film for manual or automatic wrapping with predefined properties.

The macro-perforated surface guarantees a perfect air circulation between film and product giving the following benefits.

▷ **HOT FILLED PRODUCTS:**

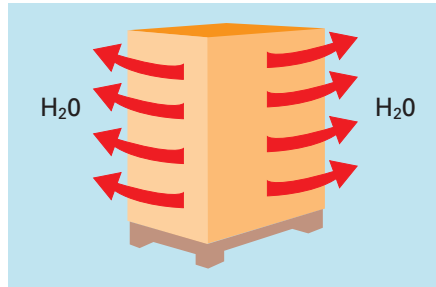

CLIMAWRAP® prevents condensation developing avoiding associated problems such as, rust on tins or caps, discolouration of packaging & labels and impaired performance of glues.

▷ **FROZEN PRODUCTS:**

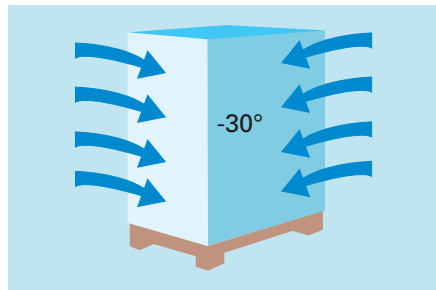

CLIMAWRAP® shortens the freezing time as the cold air comes through to the product quicker. Also the defreezing time is shortened as the moisture can escape faster.

▷ **FRESH PRODUCE & PLANTS:**

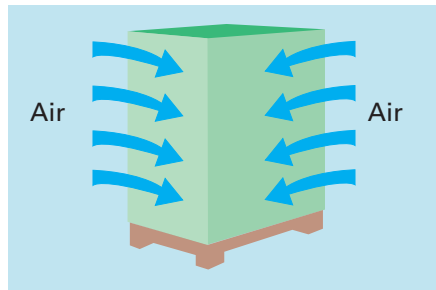

CLIMAWRAP® gives product protection combined with optimal air circulation contributing to longer lasting freshness.

Hot palletized product

Frozen palletized product

Fresh palletized product

**CLIMAWRAP® Perforated film**

Width 420/470 mm

Length from 250 to 1,500 m

Gauge 8 - 11 µ

On core of 50 mm and 76 mm diameter

Bulk or in boxes

## 1 Cost effective

By reducing the quantity of wrap required, the innovative wrapping concept can deliver a significant reduction in cost of wrapping a pallet.

## 2 Environmentally friendly

CLIMAWRAP® is 100% recyclable.

## 3 Reliable

CLIMAWRAP® guarantees a quality packaging without losing any cling or holding force at temperature's down to -30 °

## 4 User friendly

The lightness of the reel and the absence of any need to stretch make this an easy product to use.

## 5 Secure

Secure and controlled wrapping decreases the risk of accidents and damage, not only to the load itself, but also to the people and equipment involved in the supply chain.
