GALEWRAP® – A unique coreless roll solution

Offers an ideal solution for ensuring stability of palletized goods during transportation. The product is easy to use, simply by applying to the pallet under tension product stability is secured removing the stretching required by traditional products.

The resulting "belt" effect restricts movement of the wrapped goods during transport. This approach not only improves pallet stability, but also facilitates pallet loading and unloading.

Wrapped and protected in film, your goods travel in complete safety, with no risk of falling over or being scattered or damaged. Thanks to the "belt" effect, goods are protected and secure during transportation.

Reliable and easy to use, cost effective and environmentally friendly, GALEWRAP® oriented film not only improves pallet stability, but also cuts wrapping costs and waste. This makes for more regular film consumption and enhanced wrapping quality.

- ▷ Complete elimination of cores removes the costs associated with storing & disposal.
- ▷ Very light rolls and easy application reducing both effort & time.
- ▷ Highest retention & restoring force ensure better load protection in transit.
- ▷ Reduction in film weight can exceed 50%.

The re-usable "EasyFix®" dispenser has been ergonomically designed to eliminate the problem of "hot hands" associated with manual wrapping using traditional "cored" film.

Re-usable dispenser "EasyFix®".

The folded film edge prevents tearing of the film in the most critical area.

GALEWRAP CORELESS® film

Width 430 mm

Length from Up to 600 m

Bulk or in boxes

1 Cost effective

By reducing the quantity of wrap required, the innovative wrapping concept can deliver a significant reduction in cost of wrapping a pallet.

2 Environmentally friendly

GALEWRAP® is 100% recyclable. Packaging waste reduction can exceed 50%.

3 User friendly

The lightness of the reel and the absence of any need to stretch make this an easy product to use. With the "EasyFix®" dispenser, no "hot hands" anymore.

4 Reliable

Secure and controlled wrapping decreases the risk of accidents and damage, not only to the load itself, but also to the people and equipment involved in the supply chain.

5 Consistency

Regardless of the operator or the wrapping machine, this concept guarantees a constant wrapping quality and cost-optimized pallet security.
