

The fast and flexible manual bundling

NAROLITE® – The fast and flexible manual bundling

A complete system consisting of an ergonomic reusable plastic hand dispenser and an oriented film roll with extremely high holding force.

- ▷ This system can be used to collate most product types in a fast, easy and economical way.
- ▷ Sticks to the products only through adhesion properties, leaves no glue residues and ensures a careful packaging of your products.
- ▷ Secures products and consigned goods, bundles and wraps up all materials.
- ▷ 100% recyclable and therefore especially environmentally friendly.
- ▷ Available as hand or machine reels.

NAROLITE® hand reel

Length 150 - 300 m

Gauge 10 - 12 μ

In boxes, with or without dispenser

NAROLITE® machine reel

Width 200 mm

Length 750 m

Gauge 10 μ

Bulk

Such an easy job :

Just attach the film end...

...wrap with little tension, tear...

...finish the wrap using the palm of the hand.

1 Environmentally friendly

NAROLITE® is 100% recyclable. Packaging waste can be reduced up to 60%.

2 User friendly

Light rolls accentuates the work security and improves the packaging process.

3 Reliable

NAROLITE® guarantees that all goods which are difficult to pack can be securely bundled in preparation for transportation or storing.
