TOOL REPAIR CENTRE

Guaranteed Quality and Service

Experienced ITW employees, using genuine ITW parts, will repair your ITW strapping tools to our standards of efficiency.

- No guesswork
- No unnecessary repairs
- Large parts inventory with trained personnel

Repair Tracking

ITW issues a serial number for each item to track the repair history. By using this simple tracking system, we can help keep tool repair costs down by identifying repeat problems. This system helps us to recognize incidences of improper tool usage and allows us to foresee any universal part failures.

Quality Service

ITW Tool Repair has trained technicians with years of experience. We repair hundreds of tools per year, and parts are only replaced when broken or worn to a point of decreasing efficiency for tool operation. Signode receives the latest manufacturing updates and changes to ensure the best quality tool repair. With the largest inventory of parts for Signode brand tools, we guarantee quality parts and labor, assuring you of expert service and optimal operating performance.

Highly-qualified Technicians

With a fully trained staff of repair technicians, we offer the best possible repair service for handheld strapping tools.

We also offer repair work on ITW Power Equipment such as strapping heads, semi & fully automatic strapping equipment.
